The CQ Press Guide to Urban Politics and Policy in the United States Christine Kelleher Palus 2016-02-11 The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States. If the old adage that "all politics is local" is even partially true, then cities are important centers for political activity and for the delivery of public goods and services. U.S. cities are diverse in terms of their political and economic development, demographic makeup, governance structures, and public policies. Yet there are some durable patterns across American cities, too. Despite differences in governance and/or geographic size, most cities face similar challenges in the management of public finances, the administration of public safety, and education. And all U.S. cities have a similar legal status within the federal system. This reference guide will help students understand how American cities (from old to new) have developed over time (Part I), how the various city governance structures allocate power across city officials and agencies (Part II), how civic and social forces interact with the organs of city government and organize to win control over these organs and/or their policy outputs (Part III), and what patterns of public goods and services cities produce for their residents (Part IV). The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text. FEATURES: Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats. Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors. Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments (population grown; size of city budgets; etc.) or historical figures (e.g., mayors), a bibliographic essay, and a detailed index. Sidebars are provided throughout, and chapters conclude with References & Further Readings and Cross References to related chapters (as links in the e-version). This Guide is a valuable reference on the topics in urban politics and policy in the United States. The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text.

The Politically Incorrect Guide to the Great Depression and the New Deal Robert Murphy 2009-03-31 In this timely new P.I. Guide, Murphy reveals the stark truth: free market failure didn't cause the Great Depression and the New Deal didn't cure it. Shattering myths and politically correct lies, he tells why World War II didn't help the economy or get us out of the Great Depression; why it took FDR to make the Depression Great; and why Herbert Hoover was more like Obama and less like Bush than the liberal media would have you believe. Free-market believers and capitalists everywhere should have this on their bookshelf and in their briefcases.

Henry Alsberg Susan Rubenstein DeMasi 2016-06-20 "Henry Alsberg's name does not spring immediately to mind when thinking about New Deal administrators, but as director of the Federal Writers' Project, Alsberg (1881-1979) played a major role in assisting writers and other creative Americans whose livelihoods were destroyed in the Great Depression. DeMasi provides a detailed account of the experiences and talents that prepared Alsberg to take on the challenge. This work on Alsberg is long overdue. Highly recommended"--Choice "Largely forgotten today, Henry Alsberg is the kind of hero we need to celebrate and the kind of man we need to emulate. Susan Rubenstein DeMasi has brought him back to life for us with her well-crafted biography of this literary savant who doubled as a human rights champion. Flawed and fascinating, Alsberg has met in DeMasi the perfect chronicler of his remarkable journey."--William F. Schulz, President, Unitarian Universalist Service Committee and former Executive Director of Amnesty International USA "The early 20th century was a turbulent time of social change, soaring political hopes and disillusion. There was the beginning of the NAACP, the American Civil Liberties Union and other social justice movements. And there was a man who worked with them all: Henry Alsberg. Susan Rubenstein DeMasi has resurrected Alsberg, entertainingly told his story, and through him, the story of anti-Semitic pogroms, the aspirations and betrayals of Communism, the persecution of dissent in America, and the first organized effort to help political prisoners. I never knew about Henry Alsberg, or his role in these issues. Now I do. And so should you."--Ira Glasser, Executive Director, American Civil Liberties Union, 1978-2001 (retired). During the Great Depression, Henry Alsberg, a journalist with a passion for social justice, directed the Federal Writers' Project, a New Deal program of the Works Progress Administration. Under his guidance, thousands of unemployed writers were hired. Despite attacks from the House Committee on Un-American Activities, the Project produced more than 1,000 publications from 1935 to 1939, including the still highly acclaimed *American Guide*

series. Some writers, such as Richard Wright, went on to storied careers. Alsberg led the Project's collection of more than 10,000 oral histories from ex-slaves, immigrants and others. Alsberg was also a leader in the struggle to save Jewish pogrom survivors in Eastern Europe. Later, he initiated the first major effort to assist international political prisoners. His friends included anarchist revolutionary Emma Goldman and U.S. Supreme Court Justice Felix Frankfurter. This book brings Alsberg to light as an important but forgotten figure of the 20th century.

Nebraska during the New Deal Marilyn Irvin Holt 2019-12-01 As a New Deal program, the Federal Writers' Project (FWP) aimed to put unemployed writers, teachers, and librarians to work. The contributors were to collect information, write essays, conduct interviews, and edit material with the goal of producing guidebooks in each of the then forty-eight states and U.S. territories. Project administrators hoped that these guides, known as the American Guide Series, would promote a national appreciation for America's history, culture, and diversity and preserve democracy at a time when militarism was on the rise and parts of the world were dominated by fascism.

Marilyn Irvin Holt focuses on the Nebraska project, which was one of the most prolific branches of the national program. Best remembered for its state guide and series of folklore and pioneer pamphlets, the project also produced town guides, published a volume on African Americans in Nebraska, and created an ethnic study of Italians in Omaha. In Nebraska during the New Deal Holt examines Nebraska's contribution to the project, both in terms of its place within the national FWP as well as its operation in comparison to other state projects.

Cancer: 100 Ways to Fight John Roberts 2010-03-29 Cancer: 100 Ways to Fight Your own attitude is your brightest guiding star. Some of success is doing what you like to do. But, more of it is doing the things you don't like to do, but must. It is too easy to make an excuse, and not do it, and fail. —John Roberts As this book goes to press early in 2010, I am 75 and into my fifth year with incurable metastatic prostate cancer, which had already spread to the bones before cancer was diagnosed and the prostate removed. The statistical prognosis for the current treatments of choice is that one-half of these patients will die within three years, 75% within five. This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness, resumed cancer growth, and the failure of bones or key organs. I am still feeling fine, no pain, living a normal life, and I have completed eight months of chemotherapy with a 63% drop in my PSA (prostate cancer blood test) without major side effects or rising PSA. I have fought this cancer and its personal consequences in more than a hundred ways as described here. Above all, a lifetime of fitness, and my current excellent physical and mental condition, supplemented by great medical care and everything else I can learn or think of, is partially responsible for my success in living beyond the average life span for my particular fatal disease. We cannot know which weapon or how much each one contributes to the extension of life, so we must use them all. The doctors all say that cancer survival is very unpredictable, and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights. So, I immediately started this book and organized my fight. I was extremely unfortunate: most prostate cancer either is so slow growing, or eliminated by removal, that survivors live for many years. In my case, it had already spread, or metastasized, to the bones prior to the operation, and that cancer is inoperable and incurable. But, some people in that condition die very early, while others, like me, live much longer. This is highly unpredictable in individual cases due to variation in patient condition, treatment effectiveness, and other unknowns. More than half of all people newly diagnosed with cancer will be cured or given extended remission. They will die of something else. Of the other half, a large number have treatable cancer and they still have many years to live. The remainder, probably including me, have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years. Nevertheless, normally incurable cancer and conventional predictability sometimes fail, and others may prolong life by fighting with strong mental and physical effort. As the disease progresses and is treated, and science advances, sometimes in great leaps, we are rarely sure of which group we are in. That uncertainty, that hope, and the dreadful power of cancer, call for great strength of character and effort in both patients and those around them. This book is about that. The animal instinct to survive is, in humans alone, expanded in our unique cortex to something much greater—the intelligent understanding of self-awareness and an intense desire to prolong the experience, growth, and emotion of life. The human spirit, beyond the mere motivation of existence, is largely responsible for all that our species has conquered and achieved. It is an essential quality to be trained, treasured, and put to use, and one of the finest ways is to survive, continue, and improve our exceptional life through our collective and individual intellect. In the last century, medical science, the visibility of living in distant years, and the recognition that we are, and can be, responsible for increasing our own longevity have ad

Republic of Detours Scott Borchert 2021-06-15 A New York Times Book Review Editors' Choice | Winner of the New Deal Book Award An immersive account of the New Deal project that created state-by-state guidebooks to America, in the midst of the Great Depression—and employed some of the biggest names in American letters The plan was as idealistic as it was audacious—and utterly unprecedented. Take thousands of hard-up writers and put them to work charting a country on the brink of social and economic collapse, with the aim of producing a series of guidebooks to the then forty-eight states—along with hundreds of other publications dedicated to cities, regions, and towns—while also gathering reams of folklore, narratives of formerly enslaved people, and even recipes, all of varying quality, each revealing distinct sensibilities. All this was the singular purview of the Federal Writers' Project, a division of the Works Progress Administration founded in 1935 to employ jobless writers, from once-best-selling novelists and acclaimed poets to the more dubiously qualified. The FWP took up the lofty goal of rediscovering America in words and soon found itself embroiled in the day's most heated arguments regarding radical politics, racial inclusion, and the purpose of writing—forcing it to reckon with the promises and failures of both the New Deal and the American experiment itself. Scott Borchert's Republic of Detours tells the story of this raucous and remarkable undertaking by delving into the experiences of key figures and tracing the FWP from its optimistic early days to its dismemberment by the House Committee on Un-American Activities. We observe notable writers at their day jobs, including Nelson Algren, broke and smarting from the failure of his first novel; Zora Neale Hurston, the most widely published Black woman in the country; and Richard Wright, who arrived in the FWP's chaotic New York City office on an upward career trajectory courtesy of the WPA. Meanwhile, Ralph Ellison, Studs Terkel, John Cheever, and other future literary stars found encouragement and security on the FWP payroll. By way of these and other stories, Borchert illuminates an essentially noble enterprise that sought to create a broad and inclusive self-portrait of America at a time when the nation's very identity and future were thrown into question. As the United States enters a new era of economic distress, political strife, and culture-industry turmoil, this book's lessons are urgent and strong.

American Guides Wendy Griswold 2016-08-26 In the midst of the Great Depression, Americans were nearly universally literate—and they were hungry for the written word. With an eye to this market and as a response to unemployment, Roosevelt's Works Progress Administration created the Federal Writers' Project. They produced the Project's American Guides, an impressively produced series that set out not only to direct travelers on which routes to take and what to see throughout the country, but also to celebrate the distinctive characteristics of each individual state. The series unintentionally diversified American literary culture's cast of characters—promoting women, minority, and rural writers—while it also institutionalized the innovative idea that American culture comes in state-shaped boxes.
