Dark net Jamie Bartlett 2015-12-17 Dark net is een onthullende beschrijving van het deel van het internet dat niet met een gewone browser te bereiken is. Hier bevinden zich de meest gevaarlijke én creatieve subculturen: de 'trollen' en pornoproducenten, de drugshandelaren en hackers, maar ook idealistische bitcoinontwikkelaars. Het is een wereld die maar een paar klikken van je verwijderd is. En toch hebben de meesten van ons hem nog nooit bezocht. Jamie Bartlett traceerde de hoofdrolspelers en ging met ze in gesprek. Wat hij ontdekte is opzienbarend en choquerend. Hij neemt je mee op een duizelingwekkende tour door deze dynamische wereld, en laat zien wat er gebeurt wanneer mensen in complete anonimiteit kunnen opereren.

Seeking Impact and Visibility Henry Trotter 2014-06-12 African scholarly research is relatively invisible globally because even

though research production on the continent is growing in absolute terms, it is falling in comparative terms. In addition, traditional metrics of visibility, such as the Impact Factor, fail to make legible all African scholarly production. Many African universities also do not take a strategic approach to scholarly communication to broaden the reach of their scholars work. To address this challenge, the Scholarly Communication in Africa Programme (SCAP) was established to help raise the visibility of African scholarship by mapping current research and communication practices in Southern African universities and by recommending and piloting technical and administrative innovations based on open access dissemination principles. To do this, SCAP conducted extensive research in four faculties at the Universities of Botswana, Cape Town, Mauritius and Namibia.

Benin International Monetary Fund 2009-08-14 This paper discusses key findings of the Sixth Review under Poverty Reduction and Growth Facility (PRGF) for Benin. The macroeconomic outlook is weaker for 2009–10, reflecting the impact of the crisis. Real GDP growth is expected to slow down to about 3–4 percent in 2009–10. The authorities' policy response of allowing automatic fiscal stabilizers to work is appropriate. The implementation of structural reforms needs to be accelerated to enhance the competitiveness of Benin's economy and increase its resilience to exogenous shocks.

Frontier Capital Markets and Investment Banking Temitope W. Oshikoya 2019-05-28 This book discusses the role of capital markets and investment banking in Nigeria, the largest frontier market economy in the world by both population size and gross domestic product. Offering a systematic framework combining conceptual principles with real practice, the book enables the reader to gain useful insight into how capital markets and investment banking work in the real world of a frontier market. The book provides a synopsis of the economic attractiveness, financial systems intermediation and capital markets, as well as the regulatory framework within a frontier market. It explores capital raising through equity and underwriting and private equity, paying particular attention to putting capital to work on mergers and acquisitions, project and infrastructure finance and real estate finance. Furthermore, it analyses asset management, pension industry and securities trading in a frontier market. The

authors use detailed case studies from Nigeria to illustrate the operations of investment banking in frontier markets. The cases, tables and charts serve as useful illustrations of the topics under discussion. With the authors' combined experience of more than 50 years as economists, finance and investment professionals and in executive leadership positions in the financial services industry, this book will interest the academic community, professionals in the financial industry, retail and institutional investors interested in frontier markets, development practitioners in international organizations and policy makers including securities and capital market regulators.

Governance, Natural Resources and Post-Conflict Peacebuilding Carl Bruch 2016-04-07 When the guns are silenced, those who

have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but governance failures often jeopardize such efforts. This book examines the theory, practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development, while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts; illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives; and presents an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students. Governance, Natural Resources, and Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources, land, water, livelihoods, and assessing and restoring natural resources.
