US Special Ops Fred Pushies 2016-07 It's the inside scoop on US military special operations. From weapons, gear, missions, and commandos, learn every military secret from the eighteenth century to today. Few aspects of the US military pique people's interest more than special ops. Due to the clandestine nature of their missions, weapons, and gear, these elite fighting forces are cloaked in an aura of intrigue that has only ratcheted upward with the expanded roles they have assumed in today's world, not to mention their recent and frequent appearances in film, books, and other mass media. In US Special Ops, longtime military author and special-ops expert Fred Pushies takes on the entire scope of America's elite fighting forces, beginning with their earliest days. Pushies profiles hundreds of weapons, gear, vehicles, missions, and commandos, from eighteenth-century fighters like Francis Marion right

up through the most advanced capabilities of today's Green Berets, Rangers, SEALs, Marine Force Recon, US Air Force combat controllers, CIA Special Activities Division, and more - well over 350 entries in all. From the tomahawks used by Rogers's Rangers to special-ops legends like Col. Aaron Bank to Operation Neptune Spear and beyond, US Special Ops is a comprehensive, informative, and unique survey of all aspects of US special operations, past and present.

He catches a young woman, a peace campaigner, eavesdropping on a meeting the Group is holding with the British Prime Minister. The Group's interests include arms manufacture, and what Chet and the young woman overhear seems to imply that it is bribing the Prime Minister to take his country into an illegal war. Could this possibly be true? Somebody believes that this is a secret that needs covering up, because Chet and the girl are attacked. Hunted down, they go into hiding, and a deadly game of cat and mouse begins. Nearly ten years later tension is reaching breaking point in Jerusalem. The now ex-Prime Minister is working as a Middle East peace envoy. BUCKLEY, BATMAN & MYNDIE: Echoes of the Victorian culture-clash frontier David Kyhber Close 2021-01-01 Sounding 6 begins with Bain Attwood's thesis Blacks & Lohans and an echo titled SEX & SORROW EAST OF MELBOURNE. Then Henry Meyrick's frontier life and death in Western Port and Gipps Land leads into Echo 93: TAMING MELBOURNE BAYSIDE & THE DANDENONGS. Turning to OPENING GIPPSLAND: elite squatters at Sale are contrasted by surviving Kooris on Jackson's Track. The narrative then backtracks in time with Echo 95: CONTRIBUTIONS TO TRUTH ABOUT SLAUGHTER IN GIPPSLAND comprising the Porter, Cox, Fels and Gardner versions of the blood-stained land-grab. Fels then reports on the Native Police actions and Morgan's recent overview of the Ganai before and after white settlement concludes the shameful issues long denied or excused. Echo 96: LIAR'S LUNCH charts the rise and fall of pioneer Angus McMillan MP before the focus shifts to the historical geography of East Gippsland clans and languages and on to missionary Bulmer at Lake Tyers with the stories of the payback of Hopping Kitty and Attwood's study of Brataualung man Tarra Bobby. Alfred Howitt's birthing of Oz anthropology with his opus The Native Tribes of South-east Australia published at the start of the 20th century is the source material of several echoes on the making of 'clever' men and on songs and song-makers. Sounding 6 closes with extracts reprinted from Professor Elkin's Aboriginal Men of High Degree – their personality and 'making', the powers of medicine men, and in conclusion Echo 106: ABORIGINAL MEN OF HIGH DEGREE IN A CHANGING WORLD.

Digital Fingerprinting Cliff Wang 2016-10-25 This is the first book on digital fingerprinting that comprehensively covers the major areas of study in a range of information security areas including authentication schemes, intrusion detection, forensic analysis and more. Available techniques for assurance are limited and authentication schemes are potentially vulnerable to the theft of digital tokens or secrets. Intrusion detection can be thwarted by spoofing or impersonating devices, and forensic analysis is incapable of demonstrably tying a particular device to specific digital evidence. This book presents an innovative and effective approach that addresses these concerns. This book introduces the origins and scientific underpinnings of digital fingerprinting. It also proposes a unified framework for digital fingerprinting, evaluates methodologies and includes examples and case studies. The last chapter of this book covers the future directions of digital fingerprinting. This book is designed for practitioners and researchers working in the security field and military. Advanced-level students focused on computer science and engineering will find this book beneficial as secondary textbook or reference.

The Fate of the Species Fred Guterl 2012-05-22 In the history of planet earth, mass species extinctions have occurred five times, about once every 100 million years. A "sixth extinction" is known to be underway now, with over 200 species dying off every day. Not only that, but the cause of the sixth extinction is also the source of single biggest threat to human life: our own inventions. What this bleak future will truly hold, though, is much in dispute. Will our immune systems be attacked by so-called super bugs, always evolving, and now more easily spread than ever? Will the disappearance of so many species cripple the biosphere? Will global warming transform itself into a runaway effect, destroying ecosystems across the planet? In this provocative book, Fred Guterl examines each of these scenarios, laying out the existing threats, and proffering the means to avoid them. This book is more than a tour of an apocalyptic future; it is a political salvo, an antidote to well-intentioned but ultimately ineffectual thinking. Though it's honorable enough to switch light bulbs and eat home-grown food, the scope of our problems, and the size of our population, is too great. And so, Guterl argues, we find ourselves in a trap: Technology got us into this mess, and it's also the only thing that can help us survive it. Guterl vividly shows where our future is heading, and ultimately lights the route to safe harbor.

Snow Falling on Cedars David Guterson 2009-08-17 He saw the soft cedars of San Pedro Island, its high, rolling hills, the low mist that lay in long streamers against its beaches, the whitecaps riffling its shoreline. The moon had risen already behind the island – a quarter moon, pale and indefinite, as ethereal and translucent as the wisps of cloud that travelled the skies. A fisherman is found dead in the net of his boat off the coast of a North American island. When a local Japanese-American man is charged with his murder, it becomes clear that what is at stake is more than one man's guilt. For on San Pedro, memories grow as thickly as cedar trees – memories of a charmed romance between a white boy and a Japanese girl. Above all, the island is haunted by what happened to its Japanese residents during the Second World War, when an entire community was sent into exile while its neighbours

watched.

De laatste man Vince Flynn 2014-11-21 Wordt verfilmd met Bruce Willis in een van de hoofdrollen Voor fans van Homeland en 24 De boeken van Vince Flynn worden door de CIA aan hun medewerkers aangeraden. De laatste man is een razendsnelle thriller van New York Times-bestsellerauteur Vince Flynn waarin antiterrorisme-expert Mitch Rapp naar Afghanistan reist om Joe Rickman op te sporen. Rickman runde op het moment van zijn verdwijning al acht jaar de geheime operaties van de CIA in Afghanistan, een schimmige taak die hem in contact bracht met iedere notoire figuur die het land rijk is. Meer dan een kwart miljoen dollar in cash is er door zijn handen gegaan, terwijl hij aan het hoofd van de black ops stond en niemand wilde weten waar dat geld aan besteed werd. Rapp moet zich een weg zien te vinden door Afghanistan, waar de Taliban, Iraniërs, Pakistanen en Russen er allemaal op uit zijn om een deel van het door oorlog verdeelde land te claimen. Terwijl het land voor zijn ogen wordt verwoest, moet Rapp even meedogenloos als zijn vijanden zijn en even onbetrouwbaar als de politici in zijn eigen regering, als hij ook maar een sprankje hoop wil hebben om zijn eigen missie tot een goed einde te brengen.

Paratextualizing Games Benjamin Beil 2021-11-30 Gaming no longer only takes place as a 'closed interactive experience' in front of TV screens, but also as broadcast on streaming platforms or as cultural events in exhibition centers and e-sport arenas. The popularization of new technologies, forms of expression, and online services has had a considerable influence on the academic and journalistic discourse about games. This anthology examines which paratexts gaming cultures have produced - i.e., in which forms and formats and through which channels we talk (and write) about games - as well as the way in which paratexts influence the development of games. How is knowledge about games generated and shaped today and how do boundaries between (popular) criticism, journalism, and scholarship have started to blur? In short: How does the paratext change the text?

Dissolution of the Veil P.C. Gebo 2000-02-04 Dr. Paul Noar, an Tri-Consortium Prize Recipient for Advance Research in Recombination, and Dr. Lea Weathers, a young and brilliant biogeneticist, embark on a search for the answer to DNA abnormalities found in recent victims of suicide. Noar, unknown to Weathers, has uncovered the catalyst for the genetic changes that have lead to this growing trend. After years of examining declassified government files, he discovers a small-scale biological experiment with cataclysmic potential. He has enlisted her help to verify his findings. What Weathers believes to be a widespread mutation is actually the result of a unique, multigenerational study, that has culminated in the dissolution of the veil between the conscious and subconscious minds of a limited number of targets. Veil Theory, nontraditional scientific speculation on the relationship between the conscious and subconscious mind, is thrown into the mainstream when the offspring of the victims begin to display prescience. Unfortunately, the money behind the madness belongs to two powerful men determined to own what could be the key to immortality. Neland Gatti, past Desert Storm and Desert Fog consultant, directs the lab used by Noar in his investigation into discarded government research. Gatti plays the end game and values only the outcomes

he can command. A cold and calculating chemist, he seizes the opportunity to have the government fund his research by promising the delivery of a new chemical tool for its use. He has not been able to repeat past successes and this early pinnacle drives him over the edge in his attempt to achieve control of time through his most recent find, the Alys-1 Project. Cameron Brooks is owner of the Brooks Agency and son of the late Marion Brooks. His fathers company developed the original Alys-1 formula for the Department of Defense. It was shelved in favor of LSD and mind-control. Thirty years later, Noar uncovers documents relating to the experiment and Cameron Brooks takes notice, as does Gatti. But Brooks has the edge. He is also in possession of a list of children, offspring of the original test group who have begun to mutate and die. Over the years he has manipulated the lives of three of these children. A perverse soul, his twisted personality has created sadistic killers of twin boys, soon to be affected by the mutation. They do his bidding as he directs the actions and discoveries of Noar. Within six months of her enlistment, Weathers discovers Noars secret files. She learns that Gatti has given Noar false information and tainted his findings. When she reveals this to Noar, in the presence of Gatti, Noar is exposed. He must escape the secret base, where the experimentation has been conducted, and flee to Cameron Brooks. Dissolution of the Veil becomes a race to find the true formula, and understand its veridical potential before the mutations bend their hosts toward suicide. It is a competition confused by altered time and displaced reality as the victim experiences past identities and fluid futures. Veil Theory has become a dangerous fact which threatens the structure of society and the stability of the world. The author.
