Paulo Freire and Multilingual Education Sandro R. Barros
2022-04-13 This collection celebrates the work of Paulo Freire by assembling transnational perspectives on Freirean-based educational models that reconsider and reimagine language and literacy instruction, especially for multilingual learners. Offering an international and comparative overview of Freire's theories and critical pedagogies in relation to multilingualism, this volume

presents innovative analyses and applications of theories and methods and features case studies in public schools, after-school and community literacy programs, and grassroots activism. Part I features chapters that expand on Freire's concepts and ideas, including critical literacies, critical consciousness, and liberatory teaching principles. Part II features chapters that discuss empirical analyses from applied research studies that draw from these philosophical concepts, making important connections to key topics on supporting students, curriculum development, and teaching. Ideal for students and scholars in language education, bilingual/multilingual methods, and sociology of education, the volume informs teacher knowledge and practice. In offering alternative paradigms to our dominant, homogenized monolingual status quo, the chapters present a shared vision of what multilingual literacy can offer students and how it can transform educational spaces into sites of imagination, creativity, and hope.

Student Success in Community Colleges Deborah J.

Boroch 2010-02-22 Student Success in Community

Colleges As more and more underprepared students enroll in college, basic skills education is an increasing concern for all higher education institutions. Student

Success in Community Colleges offers education leaders, administrators, faculty, and staff an essential resource for helping these students succeed and advance in college.

By applying the book's self-assessment instrument,

colleges can pinpoint how their current activities align with the most effective proven practices. Once the gaps are identified, community college leaders can determine the best strategic direction for improvement. Drawing on a broad knowledge base and illustrative examples from the most current literature, the authors cover organizational, administrative, and instructional practices; program components; student support services and strategies; and professional learning and development. Designed to help engage community college leadership and practitioners in addressing the practices, structures, and obstacles that enhance or impede the success of basic skills students, the book's strategies can be tailored to various institutional levels, showing how to unite faculty, staff, and administrators in a cooperative effort to effect institutional change. Finally, *Student Success in Community Colleges* reveals how investing in a comprehensive basic skills infrastructure can be a financially sustainable model for the institution as well as substantially beneficial to students and society. "This is a most unusual and valuable book; it is packed with careful analysis and practical suggestions for improving basic skills programs in community colleges. Compiled by a team of practicing professionals in teaching, administration, and research, it is knowledgeable about what has been done and imaginative and practical about what can be done to improve the access and success of community college students."—K. Patricia Cross, professor of higher education, emerita, University of California, Berkeley "For its first hundred years the community college was committed primarily to access; in its second hundred

years the commitment has changed dramatically to success. This book provides the best road map to date on how community colleges can reach that goal."—Terry O'Banion, president emeritus, League for Innovation, and director, Community College Leadership Program, Walden University "This guide is the most comprehensive source of information about all facets of basic skills or developmental education. It will be invaluable not just to community college educators across the nation, but also to those in high schools and four-year colleges who share similar problems."—W. Norton Grubb, David Gardner Chair in Higher Education, University of California, Berkeley

Beyond English, Inc David B. Downing 2002 This work intervenes in debates about the future of English studies as business interests reach deeper into the domains of higher education. The essays address historical and theoretical questions about the relationships among management pressures, disciplinarity, and curricula reform.

The Future of the Urban Community College: Shaping the Pathways to a Multiracial Democracy Gunder Myran 2013-09-13 Urban community colleges--and the cities they serve--are undergoing rapid, multidimensional changes in response to new conditions and demands. The challenge for all community colleges, regardless of size or location, is to reinvent themselves so they can better meet the particular needs of their respective communities. This national higher-education mandate is vital to democracy itself, especially given the multiracial nature of metropolitan areas, where challenges and opportunities

have always been most pronounced. This volume looks at how urban colleges are vigorously exploring new strategies for sustainability and success. Some of the most prominent practitioners examine every major aspect of the change-engagement process, including the role of governing boards, workforce development, community partnerships, and redesign of outdated business and finance models. This is the 162nd volume of this Jossey-Bass higher education quarterly report series, an essential guide for presidents, vicepresidents, deans, and other leaders in today's open-door institutions, this quarterly provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

Communities: Critical Pedagogy and Mentoring English

Learners (2nd Edition) provides a foundation for

understanding service-learning (SL) practices for those

working with English Learners or pre-service teachers

who have ELs in their classroom. Through three distinct

parts, this text guides the reader through the core values

of SL and provides specific examples and models of SL

practices with ELs in the classroom and encourages

leadership and advocacy in the school community. This

book contributes to the understanding of SL models and

how this educational approach to learning can enhance

understanding of English Learners in the community. In

this new edition, there are many critical updates to

research practices and application. The book updates all

chapters related to pedagogical practices, TESOL

Standards, Critical Pedagogy, and Assessment. In addition to updating the TESOL Standards, the WIDA Standards have been added and incorporated into current SL practices. Two additional chapters focus on infusing technology into service-learning, discussing Digital Badging in assessment and Virtual Tutoring models. English learner needs are expanded to include Dual Language as an important model for teaching. The last chapter presents a compelling argument for instructors who utilize service-learning in their classrooms to participate in a service-learning opportunity as a student to gain insight into the student service learning experience.

Extended Curriculum Programmes Tennyson Mgutshini 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study. Even so, this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness; poor selection mechanisms in the identification of ECP students; poor numeracy and literacy amongst students, and indifferent teacher involvement in ECPs. This volume offers a rare insight into many of the above-recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector.

Building Transfer Student Pathways for College and Career Success Sonya Joseph 2018-10-04 Published in partnership with the National Institute for the Study of Transfer Students. Analysis of bachelor's degree completion suggests that only about a third of college graduates attend a single institution from start to finish. More than one quarter earn college credits from three or more schools before completing a degree. For most, these student-defined pathways lead to increased time-to-degree and higher costs. Many will simply drop out long before crossing the finish line. Ensuring college completion and success requires an understanding of the evolving nature of transfer transitions and a system-wide approach that reaches beyond two-year and four-year institutions to include high schools participating in dual enrollment programs and military college initiatives. A new edited collection offers insight into institutional and statewide partnerships that create clearly defined pathways to college graduation and career success for all students.

Re-envisioning Higher Education's Public Mission Antigoni Papadimitriou 2020-11-21 This book covers

initiatives related to higher education's public mission such as university-community engagement, knowledge transfer, economic development, and social responsibility, using empirical and conceptual cases in the US, South America, Europe, Africa, and Asia. In order to develop a better understanding of public mission initiatives in higher education across the globe, the volume editors developed a theoretical framework emerging from organizational theory. Each chapter analysis uses both external environmental elements (political, economic, sociocultural, and technological), as well as internal institutional elements (mission, vision, leadership, and governance). Finally, each chapter highlights issues related to implementation and challenges with the intent of prompting readers to consider appropriate ways in which to adopt some of the lessons learned by the contributing authors. Understanding Language Use in the Classroom Susan J. Behrens 2014-05-01 It is clear that a proper understanding of what academic English is and how to use it is crucial for success in college, and yet students face multiple obstacles in acquiring this new 'code', not least that their professors often cannot agree amongst themselves on a definition and a set of rules.

Understanding Language Use in the Classroom aims to bring the latest findings in linguistics research on academic English to educators from other disciplines, and

to help them help their students learn and achieve. Behrens combines a powerful argument for the importance of explicit teaching of language skills in college with answers to common questions from professors and students, as well as sample teaching materials to help make these issues come alive in the classroom.

Hanging Out and Hanging On Elsa Nunez 2014-05-07

Hanging Out and Hanging on: From the Projects to the Campus chronicles the progress of students from Hartford and Manchester, Connecticut, who are enrolled in the Dual College Enrollment Program (DCEP) at Eastern Connecticut State University. "Hanging Out" sets the stage for describing the program by first reaching back in time to tell of Dr. Núñez's own beginnings in Puerto Rico and Newark, New Jersey, of her struggles as a non-English speaking elementary school student and her triumphs in high school and college. The next section of the book describes the lives of Latinos in Connecticut and the social, economic, and educational challenges they have faced over time. Her personal experiences and desire to improve the lives of the underprivileged led Dr. Núñez to create the DCEP Program. Through the words of faculty and staff and the personal accounts of six DCEP students, you will read stories of desperation and hope, of struggle and triumph, of heart-breaking failure and stunning success. We hope their story can serve as a model for other communities to follow.
