3 Works Martha Rosler 1981 "Martha Rosler traces the ways in which art draws its meaning from within its social and political frameworks. The book's two artworks and a related essay exemplify and investigate the social embeddedness of art. They suggest how changing times and changing circumstances affect not only the form and meaning of photography but also its effects on its audience ... The artwork, 'The restoration of high culture in Chile' (1977) is a photo and text work that, in fictionalized form, examines the various degrees of political anaesthesia and moral corruption implied by a successful adaptation to unquestioned and abstract notions of high culture ... The photo-and-text work 'The Bowery in two inadequate descriptive systems' (1974-1975) throws into question the ability of contemporary urban photography to continue the historical potential of social documentary photography. Its accompanying work, 'In, around, and afterthoughts,' written especially for the first edition of 3 works, is a fully developed critical essay in which this question is explored more systematically"--Publisher's website, viewed on March 13, 2015.

Letters, Numbers, Forms Raymond Queneau 2007 The first English translation of essays from one of the twentieth century's most intriguing avant-garde writers Compiled from two volumes of Raymond Queneau's essays (*Bâtons, chiffres et lettres* and *Le Voyage en Grèce*), these selections find Queneau at his most playful and at his most serious, eloquently pleading for a certain classicism even as he reveals the roots of his own wildly original oeuvre. Ranging from the funny to the furious, they follow Queneau from modernism to postmodernism by way of countless fascinating detours, including his thoughts on language, literary fashions, myth, politics, poetry, and other writers (Faulkner, Flaubert, Hugo, and Proust). Translator Jordan Stump provides an introduction as well as explanatory notes about key figures and Queneau himself.

D. H. Lawrence: Late Essays and Articles D. H. Lawrence 2004-04 In his last years D. H. Lawrence often wrote for newspapers; he needed the money, and clearly enjoyed the work. He also wrote several substantial essays during the same period. This meticulously-edited collection brings together major essays such as *Pornography and Obscenity* and Lawrence's spirited Introduction to the volume of his *Paintings*; a group of autobiographical pieces, two of which are published here for the first time; and the articles Lawrence wrote at the invitation of newspaper and magazine editors. There are thirty-nine items in total, thirty-five of them deriving from original manuscripts; all were written between 1926 and Lawrence's death in March 1930. They are ordered chronologically according to the date of composition; each is preceded by an account of the circumstances in which it came to be published. The volume is introduced by a substantial survey of Lawrence's career as a writer responding directly to public interests and concerns.

An Essay on the Principle of Population Thomas Robert Malthus 1998 English economist and professor Thomas R. Malthus (1766-1834) caused great public controversy among the optimistic positivists of his day when his *Essay on the Principle of Population* (1798) showed incontrovertibly that population, when unchecked, tends to increase faster than the availability of subsistence.

Therefore preventive checks on population increase are necessary. Malthus, whose work influenced the research of Charles Darwin, admitted he was pessimistic about the future of humankind. He argued, through mathematical proofs and scientific documentation, that without population control the societal result is overcrowding, disease, war, poverty, and vice.

Write All These Down Joseph Kerman 1994 Joseph Kerman is one of the most eminent, wide ranging, and readable of today's writers on music. Admirers of his many books - on musicology, opera, Beethoven, and Elizabethan music - will find much to interest them in this collection of essays, taken from general journals, such as the Hudson Review and the New York Review of Books, as well as more specialized publications. Included are several well-known pleas addressed by Kerman to his professional colleagues in an effort to get them to adopt a more critical orientation for their work. Other essays range from a moving account of William Byrd as a spokesman for the beleaguered Elizabethan Catholic minority to a discerning analysis of Beethoven's famous obsession with the key of C minor. The controversial tenets of Kerman's classic Opera as Drama (1956) are reaffirmed in essays on Don Giovanni, The Magic Flute, Tristan und Isolde, Ernani, and I Lombardi. Beautifully written, this book offers challenging models for a humane and historically informed music criticism.

Charles Olson and Alfred North Whitehead Shachar Bram 2004 Annotation "Through a detailed and thoughtful study of the impact of Alfred North Whitehead's philosophy on Olson's aesthetic theory, this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson's major work, *The Maximus Poems*." "On the one hand, concrete poetic units of *The Maximus Poems* serve as a starting point for clarifying how different elements are joined together in one unity. On the other hand, the book traces the blending of the whole poem at the macro level, following its course through a temporal progress in which the poem moves from one poetic unit to the next; that is, from a unity (of multiplicity) to a new unity (in which the previous unity is already part of the multiplicity building the new one). Thus the book illuminates Olson's theory of the Long Poem as an "all-containing" corpus, governed by metaphysical principles, equal to life itself, enacted in the process of working on *The Maximus Poems*."--BOOK JACKET. The Mind and Its Discontents Grant Gillett 1999 Grant Gillett argues that to understand mental illness fully requires more than a study of biological models of mental processes and pathologies. As intensely social animals, he argues, we need to look for the causes of human mental disorders in our interactions with others; in socialrule-following and its role in the organization of mental content; in the power relations embedded within social structures and cultural norms; in the way that our mental life is inscribed by a cumulative life of encounters with others. Gillett uses material arising in the study of philosophy ofmind, epistemology, post-modern continental philosophy, and philosophy of language to try to elucidate the nature of psychiatric phenomena involving disorders of thought, perception, emotion, moral sense, and action. Within this framework, a series of chapters analyse important psychiatric disorderssuch as depression, attention deficiency, autism, schizophrenia, and anorexia. Along the way, Gillett explores the nature of memory and identity; of hysteria and what constitutes rational behaviour; and of what causes us to label someone a psychopath or deviant. This fascinating book will providereaders with important insights into the causes and nature of psychosis. In addition, Gillett's arguments have considerable implications for the way in which we understand and treat people suffering from psychiatric disorders. *The Mind and its Discontents* will be read by researchers andpostgraduate students in a range of academic areas, including psychiatry, bioethics, philosophy of mind, social theory, and clinical psychology. It will also be of considerable interest to practising psychiatrists.

The Valiant Knights of Daguerra Sadakichi Hartmann 1978-01-01 "From 1898 until shortly after World War I, Hartmann rampaged through the photographic world, first as Alfred Stieglitz's iconoclastic hatchetman of the Photo-Secession movement, later as an unruly rebel sniping away at his mentor under the pseudonym of Caliban. One of the most prolific photographic critics of all time,

Hartmann discovered many of our greatest photographers, championed photography as an art form, and sparked endless controversies about the medium." -- page [2] of cover.

Essays in Trespassing Albert O. Hirschman 1981-08-31 This book brings together fourteen articles and papers written by Albert O. Hirschman. About half deal with the interaction of economic development with politics and ideology, the area in which Hirschman perhaps has made most noted contributions. Among these papers are 'The Rise and Declines of Development Economics', a magisterial and yet pointed essay in intellectual history and his famous article 'The Changing Tolerance for Income Inequality in the Course of Economic Development'. Hirschman's ability to trespass - or rather his inability not to trespass - from one social science to another and beyond is the unifying characteristic of the volume. Authoritative, searching surveys alternate here with essays presenting some of Hirschman's characteristic inventions, for instance the 'tunnel effect' and 'obituary-improving activities'. Three of the papers have not been published previously and a number of introductory notes have been especially drafted for the present volume to evoke the intellectual-political climate in which certain groups of essays were written.

Een pleidooi voor echt eten Michael Pollan 2014-12-17 EET NOOIT IETS WAT JE OVERGROOTMOEDER NIET ALS VOEDSEL ZOU HERKENNEN! Vroeger wisten mensen hoe ze moesten eten, maar de dieetregels die van generatie op generatie zijn doorgegeven, zijn verwrongen en vervormd door de marketeers van de voedingsmiddelenindustrie, door zogenaamde voedingsdeskundigen en door de media. Het gevolg is dat we dolen door een landschap van voedselachtige substanties die om het hardst gillen dat ze goed voor ons zijn. Echt eten verdwijnt uit beeld om te worden vervangen door `voedingsstoffen`. En deze producten zijn juist slecht voor de gezondheid. We zouden minder eten moeten kopen en er meer voor moeten betalen. Daar worden we zelf beter van, maar ook het milieu, ons ecosysteem en onze samenleving. Door wereldwijd te kijken naar traditionele diëten kunnen we zelf een evenwichtig en gezond eetgedrag terugvinden. Een pleidooi voor echt eten wordt wereldwijd vertaald. In

The Muse in the Machine T. R. Hummer 2006 Music, race, politics, and conscience. In these eight essays written over the span of a decade and a half, T. R. Hummer explains how, for him, such abiding concerns revolve around the practice of poetry and the evolution of a culturally responsible personal poetics. Hummer writes about the suicide of poet Vachel Lindsay, the culture wars at the National Endowment for the Arts, the 1991 Persian Gulf War, the divided soul of his native American South, and the salving, transcendent practice of musicianship. Inevitably entwined with a personal or cultural component, Hummer's criticism is thus grounded in experience that is always familiar and often straight to the heart in its rightness. In one of those statements of "poetic purpose" that goes hand in hand with a residency, guest editorship, or lecture tour, Hummer once wrote that "poetry inhabits and enunciates an incommensurable zone between individual and collective, between body and body politic, an area very ill-negotiated by most of us most of the time. Our culture, with its emphasis on the individual mind and body, teaches us very little about how even to think about the nature of this problem. . . . E pluribus unum is a smokescreen: what pluribus; what unum? And yet this phrase is an American mantra, as if it explained something." This is a quintessential Hummer moment: a writer has just given himself a good reason to quit. What Hummer knows must happen next is what The Muse in the Machine is all about.

An Eye For Fractals Michael Mcguire 1991-07-21 Offers an examination of fractals, discussing their discovery and their properties Mindblindness Simon Baron-Cohen 1995-01 In Mindblindness, Simon Baron-Cohen presents a model of the evolution and development of "mindreading." He argues that we mindread all the time, effortlessly, automatically, and mostly unconsciously. It is the natural way in which we interpret, predict, and participate in social behavior and communication. We ascribe mental states to

people: states such as thoughts, desires, knowledge, and intentions. Building on many years of research, Baron-Cohen concludes that children with autism suffer from "mindblindness" as a result of a selective impairment in mindreading. For these children the world is essentially devoid of mental things. Baron-Cohen develops a theory that draws on data from comparative psychology, from developmental psychology, and from neuropsychology. He argues that specific neurocognitive mechanisms have evolved that allow us to mindread, to make sense of actions, to interpret gazes as meaningful, and to decode "the language of the eyes."

Food Justice and Narrative Ethics Beth A. Dixon 2018-09-06 Beth A. Dixon explores how food justice impacts on human lives. Stories and reports in national media feature on the one hand hunger, famine and food scarcity, and on the other, rising rates of morbid obesity and health issues. Other stories-food justice narratives-illustrate how to correct the ethical damage created by the first type of story. They detail the nature of oppression and structural injustice, and show how these conditions constrain choices, truncate moral agency, and limit opportunities to live well. With stories from national media, food and farming memoirs, and scholarly ethnographies, Dixon reveals how different food narratives are constructed, and enable identification of just solutions to issues surrounding food insecurity, farm labor, and the lived experience of obesity. Drawing on Aristotle's concept of ethical perception, Dixon demonstrates how we can use narratives to enhance our understanding and ethical competence about injustice in relation to food. *Learning to See Food Justice* is a must-read for students of food studies, philosophy, and media studies.

The Diachronic Mind M.V. Slors 2001-05-31 The Diachronic Mind makes an original contribution to current philosophical debates on the nature of personal identity and the reducibility of the mind. It traces traditional problems facing psychological continuity theories of personal identity to the ease with which theorists of personal identity adopt and apply a sometimes naive physicalism about the

mind. This novel diagnosis opens that way to new solutions to traditional problems in the debate on the psychological criterion of personal identity. Through these solutions, an unorthodox version of nonreductive physicalism about the mind-brain relation is developed that avoids the recurrent epiphenomenalism objection to such positions. The book is written in a crisp style that presupposes no more than an elementary knowledge of philosophy. It is intended for students and professional philosophers alike.
