Language MOOCs Elena Martín-Monje 2015-08-17 Language MOOCs (or LMOOCs) are dedicated Web-based online courses for second languages with unrestricted access and potentially unlimited participation. They are generating interest and expectation in the contexts of university education, lifelong learning and online training in general. This pioneering book presents an initial analysis of the theoretical and methodological issues underlying LMOOCs and presents empirical evidence of their potential for the development of language communicative competences, based upon previously unpublished research. It provides a mosaic-like view of LMOOC research, not only with respect to the geographical and institutional origin of its authors, but also to the heterogeneous nature of their respective academic backgrounds, and suggests directions for future development. As in other types of online language courses, the integration of the results of multidisciplinary research projects and teaching experiences related to LMOOCs is fundamental to make the field advance steadily and respond to some of the real challenges and problems faced by individuals working and living in competitive plurilingual societies today.

English-Medium Instruction and the Internationalization of Universities Hugo Bowles 2020-09-10 This edited book examines English-Medium Instruction (EMI) language policy and practice in higher education around the world, highlighting how English language usage affects the internationalization of universities, the way that disciplines are taught and learned, and questioning whether internationalization through EMI achieves the values of global citizenship and inclusivity/diversity to which it aspires. Written by experts in the field, the book includes data-based research from universities around the globe, with three chapters on Asia and the Far East (Malaysia, Japan and China), four on Europe (Denmark, the Netherlands and Italy) and one each on Africa (Ethiopia) and Central America (Mexico). Sources include policy documents, questionnaire surveys, focus groups and semi-structured interviews involving university policymakers, lecturers, students, and administrative staff. This book will be of interest to students and scholars of language and education policy, internationalization and applied linguistics, particularly English-Medium Instruction (EMI), academic English and English as a Lingua Franca (ELF).

ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas 2014-10-01 The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or

modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.

Central Banks, Democratic States and Financial Power Jocelyn Pixley 2018-06-30 When the Federal Reserve, European Central Bank and Bank of England purchased bank and state debt during the 2007–2008 crisis, it became apparent that, when technically divorced from fiscal policy, monetary policy cannot revive but only prevent economic activity deteriorating further. Pixley explains how conflicting social forces shape the diverse, complex relations of central banks to the money production of democracies and the immense money creation by capitalist banking. Central banks are never politically neutral and, despite unfair demands, are unable to prevent collapses to debt deflation or credit/asset inflation. They can produce debilitating depressions but not the recoveries desired in democracies and unwanted by capitalist banks or war finance logics. Drawing on economic sociology and economic histories, this book will appeal to informed readers interested in studying democracies, banks and central banking's ambivalent positions, via comparative and distributive perspectives.

Corpus Approaches to Contemporary British Speech Vaclav Brezina 2018-05-23 Featuring contributions from an international team of leading and up-and-coming scholars, this innovative volume provides a comprehensive sociolinguistic picture of current spoken British English based on the Spoken BNC2014, a brand new corpus of British speech. The book begins with short introductions highlighting the state-of-the-art in three major areas of corpus-based sociolinguistics, while the remaining chapters feature rigorous analysis of the research outcomes of the project grounded in Spoken BNC2014 data samples, highlighting English used in everyday situations in the UK, with brief summaries reflecting on the sociolinguistic implications of this research included at the end of each chapter. This unique and robust dataset allows this team of researchers the unique opportunity to focus on speaker characteristics such as gender, age, dialect and socio-economic status, to examine a range of sociolinguistic dimensions, including grammar, pragmatics, and discourse, and to reflect on the major changes that have occurred in British society since the last corpus was compiled in the 1990s. This dynamic new contribution to the burgeoning field of corpus-based sociolinguistics is key reading for students and scholars in sociolinguistics, corpus linguistics, pragmatics, grammar, and British English.

The Construction of Discourse as Verbal Interaction María de los Ángeles Gómez González 2018-09-20 This edited volume showcases new work on discourse analysis by big names in the field and promising early-career researchers. Arising from the latest in the series of IWoDA workshops in Santiago de Compostela, it provides novel insights into both the explicit and the implicit characteristics of discourse as used in verbal interaction. Discourse markers, as their name indicates, are among the explicit signals of coherence, while discourse relations may be either explicit or implicit. Similarly, the discourse used for purposes of evaluation, stance-taking and interpersonal engagement is either overt or covert, as is also true of the expression of emotions and empathy. This, in general terms, is the challenging terrain into which the contributors to this volume have ventured. The book combines theoretical issues with a practical orientation, comparing languages, analysing different registers, studying the openings of Skype conversations, and much more besides; it will prove highly relevant for postgraduate and advanced practitioners of discourse analysis, interaction studies, semantics and pragmatics.

Tag Questions in Conversation Ditte Kimps 2018-05-15 This monograph deals with variable tag questions. These are utterances with a variable interrogative tag, like It's peculiar writing, isn't it, and the semi-variable tag innit, such as Nice, innit. The aim is to provide a corpus-based, comprehensive

semantic-pragmatic typology of British English tag questions. Compared to existing descriptions, the proposed typology is novel in three ways. Firstly, whereas almost all existing typologies are single-layered classifications, the functions of tag questions are categorized into two parallel dimensions of interpersonal meaning: the speech function and the stance layer. Secondly, semantic generalizations are proposed for clusters of grammatical, intonational and conversational properties. Thirdly, the bottom-up description is based on a sizeable amount of authentic, spontaneous conversations, which are analysed both qualitatively and quantitatively.
