A Practical Guide to Global Point-of-Care Testing Mark Shephard OAM 2016-11-01 Point-of-care testing (POCT) refers to pathology testing performed in a clinical setting at the time of patient consultation, generating a rapid test result that enables informed and timely clinical action to be taken on patient care. It offers patients greater convenience and access to health services and helps to improve clinical outcomes. POCT also provides innovative solutions for the detection and management of chronic, acute and infectious diseases, in settings including family practices, Indigenous medical services, community health facilities, rural and remote areas and in developing countries, where health-care services are often geographically isolated from the nearest pathology laboratory. A Practical Guide to Global Point-of-Care Testing shows health professionals how to set up and manage POCT services under a quality-assured, sustainable, clinically and culturally effective framework, as well as understand the wide global scope and clinical applications of POCT. The book is divided into three major themes: the management of POCT services, a global perspective on the clinical use of POCT, and POCT for specific clinical settings. Chapters within each theme are written by experts and explore wide-ranging topics such as selecting and evaluating devices, POCT for diabetes, coagulation disorders, HIV, malaria and Ebola, and the use of POCT for disaster management and in extreme environments. Figures are included throughout to illustrate the concepts, principles and practice of POCT. Written for a broad range of practicing health professionals from the fields of medical science, health science, nursing, medicine, paramedic science, Indigenous health, public health, pharmacy, aged care and sports medicine, A Practical Guide to Global Point-of-Care Testing will also benefit university students studying these health-related disciplines.

De verkeerde bruid Stephanie Laurens 2012-08-01 Gyles Rawlings, de vijfde graaf van Chillingworth, heeft besloten te trouwen met een echte lady die hem veel zonen zal schenken, gehoorzaam is, en een oogje dichtknijpt als hij zijn maitresse bezoekt. Francesca lijkt hem een geschikte keuze, ook al heeft hij haar nog nooit ontmoet. Voor het altaar ontdekt Gyles tot zijn stomme verbazing dat hij de verkeerde bruid te pakken heeft. Francesca blijkt allesbehalve gedwee.

Veilig opgroeien Andrew Turnell 2012-06 In Veilig opgroeien (oorspronkelijke titel Signs of Safety), wordt een nieuwe benadering in de bescherming van kinderen gepresenteerd. Hulpverleners in de jeugdzorg en kinderbescherming kunnen hiermee potentieel risicovolle situaties beoordelen en vinden hierin praktische hands-on strategieën voor het opbouwen van een samenwerkingrelatie met de ouders. Uit de praktijk blijkt dat dit op de lange termijn kindermishandeling en uit huis plaatsing kan voorkomen. Er zijn weinig beroepsgeen waarbij emotie zo'n grote rol speelt als bij hulpverleners in de jeugdzorg en de kinderbescherming. Logisch; het gaat immers om kwetsbare kinderen die bedreigd worden in hun ontwikkeling, of erger. Daarom heeft ook iedereen een oordeel over het werk van deze hulpverleners. Zij liggen vaak onder vuur: omdat ze wél ingrijpen of omdat ze niet ingrijpen. Het gevolg is dat hulpverleners steeds vaker risicomijdend gedrag vertonen - het beruchte Savanna-effect - dat tot meer uithuisplaatsingen van kinderen leidt. De auteurs van Veilig opgroeien bieden een beter alternatief. Zij hebben in de praktijk vastgesteld dat samenwerking met het gezin de beste resultaten oplevert. In negen hoofdstukken worden zowel het theoretische kader als de praktijkelementen van Signs of Safety uitgebreid behandeld. Dit praktijkboek laat zien hoe je deze benadering steeds kunt toepassen: van intake via onderzoek en beoordeling tot afsluiting van het dossier.

Principles of Critical Care in Obstetrics Alpesh Gandhi 2016-03-02 Critical care in obstetrics is an upcoming specialty in the developing countries. This book is first of its kind as there are very few books written on this subject with the South East Asian perspective. The book discusses various aspects of critical care in obstetrics starting from the basic principles, physiology, ethics, monitoring and organization of a critical care unit. The various chapters cover management of life threatening illnesses involving various organ systems of the body of a pregnant woman. Furthermore, the management of a pregnant woman is unique as it involves not only management of the patient but the developing fetus in her womb as well. This book aims to help the obstetricians, postgraduate students and critical care providers with the

management protocols in dealing with critically ill pregnant women.

Histopathology Specimens Derek C. Allen 2012-08-14 Covering anatomical, clinical, pathological and laboratory aspects of surgical histopathology specimens, Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition relates specimen dissection and its clinical context to relevant histopathology reports, and therefore a more comprehensive patient prognosis and management is possible. Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition explains pathological and clinical terminology, including a glossary of clinical request form abbreviations. A standardised step-wise approach to specimen handling is illustrated with simple line diagrams and highlights essentials of the histopathology report, relating them to appropriate specimen dissection. The integrated multidisciplinary team approach taken to the modern clinical management of patients is reflected by correlating patient presentation, diagnostic and staging investigations with histopathology specimens. Current WHO and TNM tumor classifications are referenced. Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition will be of educative value and act as a reference tool for the medical undergraduate student, medical trainee in histopathology and the biomedical scientist, and as a useful aide memoire for

the histopathology consultant.
