Billboard 1992-11-14 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

The Atlas of Boston History Nancy S. Seasholes 2019-10-10 Few American cities possess a history as long, rich, and fascinating as Boston's. A site of momentous national political events from the Revolutionary War through the civil rights movement, Boston has also been an influential literary and cultural capital. From ancient glaciers to landmaking schemes and modern infrastructure projects, the city's terrain has been transformed almost constantly over the centuries. The Atlas of Boston History traces the city's history and geography from the last ice age to the present with beautifully rendered maps. Edited by historian Nancy S. Seasholes, this landmark volume captures all aspects of Boston's past in a series of fifty-seven stunning full-color spreads. Each section features newly created thematic maps that focus on moments and topics in that history. These maps are accompanied by hundreds of historical and contemporary illustrations and explanatory text from historians and other expert contributors. They illuminate a wide range of topics including Boston's physical and economic development, changing demography, and social and cultural life. In lavishly produced detail, The Atlas of Boston History offers a vivid, refreshing perspective on the development of this iconic American city. Contributors Robert J. Allison, Robert Charles Anderson, John Avault, Joseph Bagley, Charles Bahne, Laurie Baise, J. L. Bell, Rebekah Bryer, Aubrey Butts, Benjamin L. Carp, Amy D. Finstein, Gerald Gamm, Richard Garver, Katherine Grandjean, Michelle Granshaw, James Green, Dean Grodzins, Karl Haglund, Ruth-Ann M. Harris, Arthur Krim, Stephanie Krueel, Kerima M. Aftellen Alan Weisman 2014-04-09 De wereld kan het best zonder de mens af. Geen probleem zelfs, de natuur gaat wel door, en menselijke sporen zullen op den duur uitgewist worden. Maar voor de mens klinkt dat helemaal niet zo geruststellend. In Aftellen laat Alan Weisman zien hoe we dit scenario kunnen voorkomen. Dat kan, al moeten we dan wel iets doen. Op dit ogenblik komen er elke drie dagen evenveel nieuwe aardbewoners bij als Amsterdam inwoners heeft. En daar is de aarde op den duur niet tegen opgewassen. Weisman gaat op reis langs plaatsen waar veel mensen dicht bij elkaar wonen om te zien hoe dat gaat, en of dat gaat. Hoeveel mensen kan de aarde aan? En wat kunnen we doen om daar uit te komen? Aftellen is een ontvucherend, verhelderend en ook hoopvol boek.

Metro 1982 Includes a special edition issue which is separately paged and unnumbered called: annual fact book (varies slightly).

Bus Services Across the UK Great Britain: Parliament: House of Commons: Transport Committee 2006-10-26 Buses are a key local service, but usage has been in decline since the 1950s. The Transport Act 1985 introduced deregulation, but that has failed to reverse that decline. The report examines the particular problems local authorities face in developing and implementing effective bus strategies. It is clear to the Committee that, for many areas, including all major metropolitan areas outside London, the current regime is not working. The Committee recommends more flexibility, and is particularly attracted by Quality Contracts. These would replace open competition with a licensed regime. Operators bid for exclusive rights to run bus services on a route or group of routes, on the basis of a local authority service specification. Independent Traffic Commissioners are another development that the Committee welcomes, and would like to see them have a higher profile and more resources and powers, especially to enforce Quality Contracts and penalise operators who do not meet their obligations. Other areas covered in the report are: securing socially necessary services outside the PTAs; congestion and bus priority; concessionary fares; and the image of the bus.

Prediction and Calculation of Crystal Structures Sule Atahan-Evrenk 2014-05-06 The series Topics in Current Chemistry presents critical reviews of the present and future trends in modern chemical research. The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology, medicine and materials science. The goal of each thematic volume is to give the non-specialist reader, whether in academia or industry, a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience. Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole. The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed. The coverage is not intended to be an exhaustive summary of the field or include large quantities of data, but should rather be conceptual, concentrating on the methodological thinking that will allow the non-specialist reader to understand the information presented. Contributions also offer an outlook on potential future developments in the field. Review articles for the individual volumes are invited by the volume editors. Readership: research chemists at universities or in industry, graduate students.

Backpacker 2007-09 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Heer van de vliegen William Golding 2016-03-11 Nog altijd even opwindend en tot nadenken stemmend als toen het in 1954 verscheen, scheidt 'Heer van de vliegen' een gewelddadig, treffend beeld van de menselijke natuur, en wat er met deze gebeurt als de beschaving ten onder gaat. Een groep schooljongens stort neer op een bebouwd eiland. Zonder ouders of ander volwassen toezicht moeten ze met elkaar samenwerken om te overleven, waar ze jammerlijk in falen. Hun strijd om het bestaan krijgt geleidelijk steeds meer barbaarse trekken. Heer van de vliegen werd bij verschijning met lof overladen, maar commercieel succes bleef in eerste instantie uit. Geleidelijk aan werd het echter een cult-favoriet onder studenten en critici, en werd het vaak vergeleken met Salingers De vanger in het graan wat betreft invloed op de moderne literatuur.

National infrastructure plan 2011 Great Britain: H.M. Treasury 2011-11-29 This National Infrastructure Plan sets out the strategy for meeting the infrastructure needs of the UK economy. There are three elements to this strategy. First, the Government will plan for the medium term and across sectors. The Plan brings together a comprehensive cross-sectoral analysis of the UK's infrastructure networks and sets out a clear pipeline of over 500 infrastructure projects. Delivering these projects will ensure that the overall performance of the UK's infrastructure is maintained and improved over time. Second, to mobilise the finance required to deliver these projects, the Plan sets out a new approach to coordinating public and private investment in UK infrastructure. Funded through further reductions in current spending, additional investment in infrastructure is being announced. The Government will act to facilitate the private investment that will finance the majority of the UK's infrastructure. This includes bringing in new investors into UK infrastructure; introducing new sources of revenue such as tolling; allowing local authorities more flexibility in the way they use local receipts to fund major infrastructure in specific circumstances; and being willing to consider guarantees against specific risks that the market cannot bear. Third, the Government will take an active role in ensuring the infrastructure in the Plan is delivered efficiently and on time, with priority given to those projects most critical for economic growth. The Government is also reforming the planning and consenting systems to tackle these sources of cost and delay in infrastructure delivery.

Network Design And Optimization For Smart Cities Pardalos Panos M 2017-05-03 This comprehensive reference text is a collection of important research findings on the latest developments in network modeling for optimization of smart cities. Such models can be used from outlining the fundamental concepts of urban development to the description and optimization of physical networks, such as power, water or telecommunications. Networks help us understand city economics and various aspects of human interactions within cities with particular applications in quality of life and the flow of people and goods. Finally, the natural environment and even the climate of cities can be modeled and managed as networks.

The WPA Guide to South Dakota Federal Writers' Project 2013-10-31 During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor.

Rocks and Minerals for the Collector Ann P. Sabina 1992 Occurrences of minerals, rocks and fossils are noted and described from localities along and adjacent to the Alaska Highway from Dawson Creek, British Columbia to the Yukon-Alaska border, as well as occurrences on branch highways (Klondike, Canol, Haines, Cassir-Dease Lake, Atlin and Sixtymile roads, and the Campbell Highway).
