The Reigate Puzzle, Sherlock Holmes Arthur Conan Doyle, Sir 2015-05-06 It was some time before the health of my friend Mr. Sherlock Holmes recovered from the strain caused by his immense exertions in the spring of '87. The whole question of the Netherland-Sumatra Company and of the colossal schemes of Baron Maupertuis are too recent in the minds of the public, and are too intimately concerned with politics and finance to be fitting subjects for this series of sketches. They led, however, in an indirect fashion to a singular and complex problem which gave my friend an opportunity of demonstrating the value of a fresh weapon among the many with which he waged his life-long battle against crime.

We agreed to play a game of billiards while chatting about our days. We hadn't seen Mycroft in several weeks, so he was ready to regale us with tales of what he called an adventure. His version of an adventure was sitting in courtrooms or at Scotland Yard to see what was happening. He was laughing so hard at a riddle he had heard while sitting in the back of a courtroom that we were having trouble understanding what it was he was saying. We let him laugh himself out and then asked him to repeat it, so we could enjoy some of the laughs. "I swear this is exactly what I heard in that courtroom. The defense attorney asked the prosecutor this question: Dana's mother is the mother of three daughters. One of her daughters has the name of Betty while the other one is named Kathy. What is the name of her other daughter?" -----
