The Collected Letters of Erasmus Darwin Erasmus Darwin 2013-01-03 Erasmus Darwin has often been cited as the most widely talented man of the past 250 years. He excelled in medicine and poetry, was an inventor and wide ranging man of science, and founded several societies. This 2006 collection of 460 of his letters provides an insight into the life of this amazing man. Darwin was famous throughout Britain as a physician; his medical letters to patients and private letters to his physician son Robert are a rich source for historians of medicine. His lively letters to the 'Lunar Men', Boulton, Watt, Keir and Wedgwood, provide insight into the Industrial Revolution in England. In the 1790s Darwin propounded the idea of biological evolution, although it was his grandson Charles who persuaded people to take it seriously. This unique collection reveals the variety of Erasmus Darwin's talents, and his wide range of important friendships.

The Invention of Journalism Ethics, Second Edition Stephen J.A. Ward 2015-09-01 Does objectivity exist in the news media? In The Invention of Journalism Ethics, Stephen Ward argues that given the current emphasis on interpretation, analysis, and perspective, journalists and the public need a new theory of objectivity. He explores the varied ethical assertions of journalists over the past few centuries, focusing on the changing relationship between journalist and audience. This historical analysis leads to an innovative theory of pragmatic objectivity that enables journalists and the public to recognize and avoid biased and unbalanced reporting. Ward convincingly demonstrates that journalistic objectivity is not a set of absolute standards but the same fallible but reasonable objectivity used for making decisions in other professions and public institutions. Considered a classic in the field since its first publication in 2004, this second edition includes new chapters that bring the book up to speed with journalism ethics in the twenty-first century by focusing on the growing dominance of online journalism and calling for a radical approach to journalism ethics reform. Ward also addresses important developments that have occurred in the last decade, including the emergence of digital journalism ethics and global journalism ethics.

Bulletin of the Atomic Scientists 1970-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Science of Aliens Mark Brake 2022-07-05 Discover the real science behind 2001, ET, Signs, and all your favorite fictional alien civilizations. As space telescopes continue to search for life in this unearthly Universe, the crucial questions remain unanswered. Are we awake to the revolutionary effects on human society and science that alien contact will bring? And how is it possible to imagine the unknown? The Science of Aliens tells the compelling story of how the portrayal of alien life has evolved over time. Taking examples from science, film, and fiction, this book showcases how scholars, filmmakers, and authors have devoted their energies to imagining life beyond this Earth. From Copernicus to Kubrick, The Science of Aliens is a fascinating account for anyone interested in extraterrestrials. Otherworldly topics include: What Xenomorphs from Alien and Na'vi from Avatar have in common Darwin among aliens Extraterrestrials in Einstein's sky Aliens in our space age And so much more Visualize the unknown and redefine your place in a changing cosmos with The Science of Aliens.

LIFE 1969-07-18 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.

MOON LANDER Thomas J. Kelly 2001-03-17 When Kelly says We, he means the team he was part of at Grumman Engineering, which built the moon lander. He led the effort on the lunar module itself. He recounts getting the bid, designing, building, testing, and flying. Annotation copyrighted by Book News Inc., Portland, OR

Sympathy in Transformation Roman Alexander Barton 2018-10-08 There is little doubt that sympathy plays a pivotal role in aesthetic as well as moral experience, yet also little agreement on how to describe this connection and its long history. This volume investigates the changes in the concept of sympathy as well as its rhetorical, poetical and ethical functions from antiquity to the threshold of Romanticism. The focus is on sympathy's development from a cosmological principle expressing the coherence, correspondence, and unity of all things into a theoretical key concept of intersubjectivity informing moral philosophy, criticism and literature. Thus, Sympathy in Transformation offers important insights into the many ways in which, when sympathy migrates into diverse discourses in Early Modernity, its ancient origins dwindle out of sight, while some of its central elements re-emerge in a surprising manner.

Tolkien's Worlds John Garth 2020-05 An expertly written investigation of the places that shaped the work of one of the world's best loved authors, exploring the relationship between worlds real and fantastical.

En je kwam niet terug Marceline Loridan-Ivens 2016-01-14 'Ik zie dat briefje weer voor me dat je me daar in handen hebt gespeeld, een slordig

stuk papier, aan één kant afgescheurd en ongeveer rechthoekig. Ik zie je naar rechts hellende handschrift en een stuk of vijf zinnen die ik me niet herinner. Van één regel ben ik nog zeker, de eerste, "Lieve kleine meid," van de laatste ook, je handtekening: "Sjomo". Alles ertussenin weet ik niet meer. Ik zoek, maar kan het me niet herinneren.' In 1944 werd Marceline Rozenberg samen met haar vader gedeporteerd. Hij kwam in Auschwitz terecht, zij enkele kilometers verderop in Birkenau. Beiden verkeerden in grote onzekerheid hoe het de ander verging. Op een dag slaagde haar vader erin Marceline een briefje te bezorgen met daarop een paar geruststellende woorden. Een dierbaar geschenk voor zijn vijftienjarige dochter. Op de eerste en laatste zin na is ze vergeten wat hij schreef. Bijna zeventig jaar later schrijft Marceline haar vader een antwoord. Ze probeert de woorden terug te vinden en tot leven te wekken wat uit haar geheugen moest worden gewist. Ze vertelt hem hoe zijzelf wél terugkwam, maar hoe niemand op haar thuiskomst zat te wachten. En je kwam niet terug is een ode aan een vader, een liefdesverklaring, en tegelijk een bitter relaas over de onmogelijkheid om verder te leven. 'Een aangrijpende afscheidsbrief aan een vader die niet uit Auschwitz terugkeerde.' – Le Monde 'Een verhaal dat door je ziel snijdt.' – Le Figaro

Men of Invention and Industry Samuel Smiles 1885

The Lunar Men Jennifer Uglow 2009 Led by Erasmus Darwin, the Lunar Society of Birmingham was a group of eighteenth-century amateur experimenters. The story brings to life this group of inventors, artisans and tycoons who shaped and inspired the modern world and kick-started the Industrial Revolution.

The Invention of Air Steven Johnson 2008-12-26 From the bestselling author of How We Got To Now, The Ghost Map and Farsighted, a new national bestseller: the "exhilarating" (Los Angeles Times) story of Joseph Priestley, "a founding father long forgotten" (Newsweek) and a brilliant man who embodied the relationship between science, religion, and politics for America's Founding Fathers. In The Invention of Air, national bestselling author Steven Johnson tells the fascinating story of Joseph Priestley—scientist and theologian, protégé of Benjamin Franklin, friend of Thomas Jefferson—an eighteenth-century radical thinker who played pivotal roles in the invention of ecosystem science, the discovery of oxygen, the uses of oxygen, scientific experimentation, the founding of the Unitarian Church, and the intellectual development of the United States. As he did so masterfully in The Ghost Map, Steven Johnson uses a dramatic historical story to explore themes that have long engaged him: innovative strategies, intellectual models, and the way new ideas emerge and spread, and the environments that foster these breakthroughs.

Practising Social Work Sociologically Priscilla Dunk-West 2018-02-13 This timely and much needed text book presents an innovative, theoretically based approach that helps students, practitioners and researchers alike orientate their view and sensibilities in a rapidly evolving modern world. Traditional social work approaches are often ill-equipped to take into account the emerging social change which has resulted from technological change, globalisation and mobilities, as well as environmental change. By bringing sociological social work perspectives to contemporary practice, it draws on concepts from a range of disciplines in recognition that we are collective thinkers and actors and that our ideas are shaped by what we read and build upon. Whether taking a social work theory module or preparing for placement, this sociological perspective provides a crucial foundation for practice and puts the 'social' back in to 'social work'.

The Lunar Men Jennifer S. Uglow 2002 In the 1760s a group of amateur experimenters met and made friends in the Midlands. Most came from humble families, all lived far from the centre of things, but they were young and their optimism was boundless: together they would change the world. Among them were the ambitious toy-maker Matthew Boulton and his partner James Watt, of steam-engine fame; the potter Josiah Wedgwood; the larger-than-life Erasmus Darwin, physician, poet, inventor and theorist of evolution (a forerunner of his grandson Charles). Later came Joseph Priestley, discoverer of oxygen and fighting radical.

Future Aeronautics and Space Opportunities United States. National Aeronautics and Space Administration 1974

The Lunar Men Jenny Uglow 2011-03-03 Led by Erasmus Darwin, the Lunar Society of Birmingham was formed from a group of amateur experimenters, tradesmen and artisans who met and made friends in the Midlands in the 1760s. Most came from humble families, all lived far from the centre of things, but they were young and their optimism was boundless: together they would change the world. Among them were the ambitious toy-maker Matthew Boulton and his partner James Watt, of steam-engine fame; the potter Josiah Wedgwood; the larger-than-life Erasmus Darwin, physician, poet, inventor and theorist of evolution (a forerunner of his grandson Charles Darwin). Later came Joseph Priestley, discoverer of oxygen and fighting radical. Led by Erasmus Darwin they joined a small band of allies, formed the Lunar Society of Birmingham (so called because it met at each full moon) and kick-started the Industrial Revolution. Blending science, art, and commerce, the Lunar Men built canals, launched balloons, named plants, gases and minerals, changed the face of England and the china in its drawing rooms, and plotted to revolutionise its soul. Jenny Uglow's The Lunar Men is a vivid and swarming group portrait that brings to life the friendships, political passions, love affairs, and love of knowledge (and power) that drove these extraordinary men. It echoes the thud of pistons and the wheeze and snort of engines, and brings to life the tradesmen, artisans, and tycoons who shaped and fired the modern age. Winner of the PEN Hessel-Tiltman prize for history, and the James Tait Black Memorial Prize for biography, The Lunar Men captures the creation of the modern world with lucid intelligence, sympathy and wisdom. Jenny Uglow is also the prize-winning author of Nature's Engraver, Elizabeth Gaskell: A Habit of Stories and most recently, In These Times.

College Cloisters - Married Bachelors Bridget Duckenfield 2014-07-03 Using archival material and many unpublished sources, this work traces the origins of Oxford and Cambridge University colleges as places of learning, founded from the thirteenth century, for unmarried men who were required to take vows of poverty, chastity, and obedience, the majority of whom trained for the priesthood. The process reveals how the isolated monk-like existence was gradually transformed from the idea of married Fellows at University Colleges being considered absurd into considering it absurd not to allow Fellows to marry and keep their fellowships and therefore their income. This book shows how the Church was accepted as an essential element in society with university trained Churchmen becoming influential in Crown, government, and State. As part of the cataclysmic change from Catholic to Protestant religion, Edward VI and his Council permitted priests to marry, partly to declare their allegiance to the new Protestant religion and their rejection of the old. However, within the university colleges the rule that Fellows would lose their fellowships immediately on marriage was insisted upon. Why a group of individuals were instructed to remain set in a medieval monastic

way of life within a nineteenth-century institution is traced in conjunction with how anomalies arose, were absorbed, accepted or challenged by a few courageous individuals prior to bringing about the ultimate change to the statutes in 1882.

Bulletin of the Atomic Scientists 1971-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

De lunar chronicles. Cinder Marissa Meyer 2013-04-17 Mensen en androïden leven samen in de grauwe straten van Nieuw Peking. Een dodelijke plaag houdt lelijk huis onder de bevolking. Vanuit de ruimte kijken de meedogenloze maanmensen toe, hun kans afwachend. Niemand weet dat het lot van de aarde afhangt van één meisje Cinder, een getalenteerde monteur, is een cyborg. Ze is een tweederangsburger met een mysterieus verleden, beschimpt door haar stiefmoeder en beschuldigd van de ziekte van haar stiefzus. Maar als prins Kai in haar leven verschijnt, bevindt ze zich plots in het midden van een intergalactische strijd. Verscheurd door de keuze tussen plicht en vrijheid, loyaliteit en verraad, moet Cinder eerst de geheimen uit haar verleden achterhalen om de toekomst van haar wereld te kunnen beschermen.

Cultural Babbage Francis Spufford 1997 With contributions from writers on both sides of the science/humanities divide, this is a collection of quirky and offbeat essays on technology, culture and forgotten or imaginary histories. Taking as its starting point Charles Babbage's 'Difference Engine', a machine imagined but never built, the book explores a range of subjects where the imagination and science and technology meet. Essays deal with such topics as the invention of the phonograph, the Victorian delight in automata and the Internet and the British. The result is a work which makes surprising connections and draws intriguing conclusions.

Biographical Encyclopedia of Scientists, Second Edition - 2 Volume Set John Daintith 1994-01-01 The Biographical Encyclopedia of Scientists: Second Edition, 2 Volume Set examines the lives and careers of noteworthy scientists and thinkers through the ages, illuminating the progress of science and its impact on society in general. From Aristotle and the beginnings of objective observations, to twentieth century giants, Freud and Hawking, this extensive in-depth reference explores the men and women who have shaped our ideas and the world in which we live today. Extensively revised and updated, this second edition comprises two substantial illustrated volumes that contain over 2,000 biographical entries and over half a million words. It looks and reads like a "Who's Who" of the world of scientific thought, providing an in-depth listing of prominent historical as well as modern figures of science and medicine. The main biographical entries are arranged alphabetically and summarize the individual's life and contribution to science. The volumes also include a chronology of the history of science from 590 BC to the present, a subject index, and a bibliography of key publications in the history of scientific thought. For anyone researching the world of scientific personalities and ideas, this unique reference work will be indispensable.

Big Ideas in Business Various 2013-12-24 Containing introductions to Innovation, Advertising, Leadership, Risk, Organizations, Management, and Entrepreneurship, in addition to The Architecture of Innovation, this set presents a collection of titles that introduce the reader to the essentials of business. Each book provides insight on the big ideas and concepts surrounding business today. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable to business professionals and general readers alike.

Media Perspectives on Intelligent Design and Evolution Mark Paxton 2013-01-09 This nonideological analysis of the debate regarding intelligent design and evolution reveals the intentional distortions and unseen influences of modern media that skew the public's view of world events and controversial issues. • Provides brief biographical profiles on some of the key individuals in the debate regarding evolution and intelligent design, including philosopher William Dembski of Seattle's Discovery Institute and former Harvard paleontologist Stephen J. Gould • Presents primary documents and photographs that support the text, as well as a timeline of the intelligent design–evolution debate • Includes an annotated bibliography for suggestions on further reading
