Exploring Technology for Writing and Writing Instruction Pytash, Kristine E. 2013-07-31 As digital technologies continue to develop and evolve, an understanding of what it means to be technologically literate must also be redefined. Students regularly make use of digital technologies to construct written text both in and out of the classroom, and for modern writing instruction to be successful, educators must adapt to meet this new dichotomy. Exploring Technology for Writing and Writing Instruction examines the use of writing technologies in early childhood, elementary, secondary, and post-secondary classrooms, as well as in professional development contexts. This book provides researchers, scholars, students, educators, and professionals around the world with access to the latest knowledge on writing technology and methods for its use in the classroom.

Integrating Library Use Skills Into the General Education Curriculum Maureen Pastine 2021-04-14 This provocative new book will help you design and implement the most effective library user education possible--one that builds on basic library use skills through a progressively sophisticated program that is fully integrated into course curriculum at all levels, from the freshman year to graduation and beyond. By exploring major issues underlying the integration of library use skills and research methodologies into the general education curriculum, contributors raise important questions, offer creative ideas, and provide insight into the many improvements made in library instruction in the past few years. Following an introduction by Patricia Breivik, a recognized national authority on libraries and general education, contributors representing two- and four-year institutions and research universities discuss such issues as the relationship between high school and college programs, research skills instruction in a remote access environment, the use of microcomputers and end user searching programs to promote critical thinking, and the improved relationship between librarians and faculty. In addition to articles on library instruction geared towards question analysis, information generation by field, structure of published knowledge and dissemination of a discipline's literature, chapters identify cooperative efforts needed among school, public, special, academic libraries and other information agencies, computer center personnel, and online database vendors. Bibliographic instruction librarians who are active participants in planning and administering library user education programs will find this volume to be essential for building and developing stronger, more integrated programs.

Typing Politics Richard Davis 2009-05-26 The power of political blogs in American politics is now evident to anyone who follows it. In Typing Politics, Richard Davis provides a comprehensive yet concise assessment of the growing role played by political blogs and their relationship with the mainstream media. Through a detailed content analysis of the most popular political blogs--Daily Kos, Instapundit, Michelle Malkin, and Wonkette--he shows the degree to which blogs influence the traditional news media. Specifically, he compares the content of these blogs to four leading newspapers noted for their political coverage: The Washington Post, The New York Times, The Wall Street Journal, and The Washington Times. He explains how political journalists at these papers use blogs to inform their reportage and analyzes general attitudes about the role of blogs in journalism. Drawing on a national survey of political blog readers, Davis concludes with a novel assessment of the blog audience. Compact, accessible, and well-researched, Typing Politics will be an invaluable contribution to the literature on a phenomenon that has reshaped the landscape of political communication.

Scientific writing for agricultural research scientists Youdeowei, A. 2012-12-31 This new, fully revised edition aims to serve as a guide for agricultural research scientists and other practitioners in writing papers for publication. It also looks to provide a resource manual for training courses in scientific writing. There are three new chapters on reporting statistical results, communicating science to non-scientific audiences and electronic publishing. In addition, the original chapters have all been rewritten to reflect current developments and to make the content more complete and easily comprehensible.

Guiding Students into Information Literacy Chris Carlson 2008-12-19 Teachers often assume students know how to do research. However, most students lack important information literacy skills and often need guidance in order to be successful researchers. Sometimes the research projects students are assigned are not well devised or planned, and teachers often underestimate the amount of time or effort necessary to complete a project.

These difficulties soon become compounded because students often have poor organizational and time management skills, which are essential in producing good research projects. The desire to make the research experience pleasant and worthwhile for students and the teacher who must assess their efforts has led authors Chris Carlson and Ellen Brosnahan to devise a logical system to help students not only gain valuable information literacy and time management skills needed but also to help the instructor have a better handle on what students are doing during the process. Information Literacy takes readers systematically through the management of a research activity, from conception to final product. Each chapter includes handouts that have been used by the authors with actual research assignments, websites for further information, and a bibliography of additional books that support the ideas in the chapter. An appendix with examples of research papers that have been done by the authors' actual students is also included.

Educational Technology Integration Foundations Mark Page-Botelho 2012-05-01 Educational Technology is a field that can be complex with many facets that need to be taken into consideration to successfully integrate into classrooms. This book is a accumulation of many years work in the field, and covers every aspect of integration. The book is intended as a resource to skip through to help guide those looking for ideas, especially for those new to technology. For those who have a solid foundation can find information about often overlooked topics, or topics not often thought about that can improve a pre-existing program.

Structured Writing Mark Baker 2018-09-10 Structured writing has never been more important or more confusing. We keep trying to do more and more with content, but we give ourselves less and less time to do it. Structured content can help keep your rhetoric on track and your processes efficient. But how does it do that and what is the relationship between rhetoric and process? It is easy to get lost in sea of acronyms and buzz words: semantics,

XML, metadata, DITA, structure, DocBook, hypertext, Markdown, topics, XSLT, reuse, LaTeX, silos, HTML. Structured Writing cuts through the noise, explaining what structured writing is (you have been doing it all along) and how you can use different structures to achieve different purposes. It focuses on how you can partition and manage the complexity of the content creation process using structured writing techniques to ensure that everything is handled by the person or process with the skills, time, and resources to handle it effectively. Most importantly, this book shows you how the right structured writing techniques can improve the quality of your content and, at the same time, make your content processes more efficient without sacrificing quality for efficiency or vice versa. There are so many options available in the structured writing space today. This book will show you where each of them fits and help you choose the approach that is optimal for your content.

**The Diary** Batsheva Ben-Amos 2020 The diary as a genre is found in all literate societies, and these autobiographical accounts are written by persons of all ranks and positions. The *Diary* offers an exploration of the form in its social, historical, and cultural-literary contexts with its own distinctive features, poetics, and rhetoric. The contributors to this volume examine theories and interpretations relating to writing and studying diaries; the formation of diary canons in the United Kingdom, France, United States, and Brazil; and the ways in which handwritten diaries are transformed through processes of publication and digitization. The authors also explore different diary formats including the travel diary, the private diary, conflict diaries written during periods of crisis, and the diaries of the digital era, such as blogs. The *Diary* offers a comprehensive overview of the genre, synthesizing decades of interdisciplinary study to enrich our understanding of, research about, and engagement with the diary as literary form and historical documentation.

**Re/Writing the Center** Susan Lawrence 2019-03-15 Re/Writing the Center illuminates how core writing center pedagogies and institutional arrangements are complicated by the need to create intentional, targeted support for advanced graduate writers. Most writing center tutors are undergraduates, whose lack of familiarity with the genres, preparatory knowledge, and research processes integral to graduate-level writing can leave them underprepared to assist graduate students. Complicating the issue is that many of the graduate students who take advantage of writing center support are international students. The essays in this volume show how to navigate the divide between traditional writing center theory and practices, developed to support undergraduate writers, and the growing demand for writing centers to meet the needs of advanced graduate writers. Contributors address core assumptions of writing center pedagogy, such as the concept of peers and peer tutoring, the emphasis on one-to-one tutorials, the positioning of tutors as generalists rather than specialists, and even the notion of the writing center as the primary location or center of the tutoring process. Re/Writing the Center offers an imaginative perspective on the benefits writing centers can offer to graduate students and on the new possibilities for inquiry and practice graduate students can inspire in the writing center. **The Myth of the Paperless Office** Abigail J. Sellen 2003-02-28 An examination of why paper continues to fill our offices and a proposal for better coordination of the paper and digital worlds. Over the past thirty years, many people have proclaimed the imminent arrival of the paperless office. Yet even the World Wide Web, which allows almost any computer to read and display another computer's documents, has increased the amount of printing done. The use of e-mail in an organization causes an average 40 percent increase in paper consumption. In The Myth of the Paperless Office, Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and the reasons they do it the way they do. Using the tools of ethnography and cognitive psychology, they look at paper use from the level of the individual up to that of organizational culture. Central to Sellen and Harper's investigation is the concept of "affordances"—the activities that an object allows, or affords. The physical properties of paper (its being thin, light, porous, opaque, and flexible) afford the human actions of grasping, carrying, folding, writing, and so on. The concept of affordance allows them to compare the affordances of paper with those of existing digital devices. They can then ask what kinds of devices or systems would make new kinds of activities possible or better support current activities. The authors argue that paper will continue to play an important role in office life. Rather than pursue the ideal of the paperless office, we should work toward a future in which paper and electronic document tools work in concert and organizational processes make optimal use of both.

Clinician's Guide to Medical Writing Robert B. Taylor 2006-03-20 This book is for the clinician who wants to write. It is for the physician, physician assistant, or nurse practitioner who sees patients and who wants to contribute to the medical literature. You may be an assistant professor aspiring to promotion or a clinician in private practice who seeks the personal enrichment that writing can bring. If you are new to medical writing or even if you have been the author of some articles or book chapters and seek to improve your abilities, this book can help you. Who am I that I can make this assertion and write this book, both fairly presumptuous? Here's my reasoning. As a practicing physician, writing has been my avocation; unlike the authors of many other writing books, I am not a journal editor. Over 14 years in private practice and 26 years in academic medicine, I have written all the major models described in this book: review articles, case reports, editorials, letters to the editor, book reviews, book chapters, edited books, authored books, and reports of clinical research studies. Most have been published. Not all. Perhaps my most significant qualification is not that I have managed to produce a lengthy curriculum vitae. In my opinion, what is more important for you, the reader, is that I have made all the errors. That's right, the mistakes.

Advances in Usability, User Experience and Assistive Technology Tareq Z. Ahram 2018-06-27 This book focuses on emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interaction with products, services and systems, and focuses on finding effective approaches for improving user experience. It also discusses key issues in designing and providing assistive devices and services to individuals with disabilities or impairment, to assist mobility, communication, positioning, environmental control and daily living. The book covers modelling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Virtual reality, digital environments, heuristic evaluation and forms of device interface feedback of (e.g. visual and haptic) are also among the topics covered. Based on the AHFE 2018 Conference on Usability & User Experience and the AHFE 2018 Conference on Human Factors and Assistive Technology, held on July 21–25, 2018, in Orlando, Florida, USA, this book reports on cutting-edge findings, research methods and user-centred evaluation approaches.

Handbook of Research on Foreign Language Education in the Digital Age Wang, Congcong 2016-07-13 The role of technology in the learning process can offer significant contributions to help meet the increasing needs of students. In the field of language acquisition, new possibilities for instructional methods have emerged from the integration of such innovations. The Handbook of Research on Foreign Language Education in the Digital Age presents a comprehensive examination of emerging technological tools being utilized within second language learning environments. Highlighting theoretical frameworks, multidisciplinary perspectives, and technical trends, this book is a crucial reference source for professionals, curriculum designers, researchers, and upper-level students interested in the benefits of technology-assisted language acquisition.

Building and Sustaining a Hospital-Based Nursing Research Program Dr. Albert Albert, PhD, CCNS, CCRN, NE-BC, FAHA, FCCM 2015-11-13 The first resource to present the "nuts and bolts" of creating a successful nursing research program. This text provides a roadmap to develop and nurture a nursing research program in complex hospital environments. Written by experienced clinical researchers who have successfully implemented these techniques in the Cleveland Clinic, the handbook shows nurses how to build and sustain a research program—a fundamental requirement to transform patient care and administrative practices and obtain and sustain American Nurses Credentialing Center Magnet® program recognition. The book demonstrates, step-by-step, how leaders and staff can integrate nursing research into the workflow of complex health care environments. It

provides a framework for developing horizontal and vertical structures that promote the creation of new knowledge and for enhancing the scientific foundation of nursing evidence. With a focus on practical applications, the book addresses the structures, systems, processes, and resources required for creating and maintaining a research program along with methods for its evaluation. The handbook describes foundational principles that apply to hospitals of all sizes (including ambulatory centers and hospitals without extensive resources), and provides concrete guidance in adapting structures and processes to fit the needs of hospitals with varied nursing staff size and program goals. Replete with a wealth of ideas and strategies, it provides detailed templates that will assist novice and more experienced researchers, guidelines for committees to support nursing research within a hospital, and discusses the “who,” “what,” “why” of systems that enhance workflow. Chapters offer experiential stories written by nurses who describe the “real world” experiences of implementing clinical research in their practice. Tables and figures further illuminate information. Key Features: Written by experienced researchers who have implemented the techniques used in this book Provides a framework adaptable for use with hospitals of all sizes Includes guidelines for committees/councils to support nursing research within the organization Discusses processes and systems that enhance collaboration and workflow Offers stories from the field by nurses about “lessons learned” from their research experiences
